Davidson, NC 28036

Supplier Code of Conduct

Ingersoll Rand Inc., its subsidiaries and affiliated companies (collectively, “Ingersoll Rand”) is committed to operating its business with the highest standards of corporate responsibility. We operate within a framework of principles, guidelines, and policies aligned with our ethical, social, and environmental responsibilities. We believe that this is critical for protecting, managing, and enhancing our brand and reputation. We also believe this will drive long-term, sustainable growth for Ingersoll Rand, our business partners, and the communities in which we operate.

We strive to conduct business with suppliers who share our commitment to operating in a responsible and ethical manner. Ingersoll Rand’s Supplier Code of Conduct outlines Ingersoll Rand’s principles of responsible supplier management for ethics, labor, environmental sustainability, health and safety, quality and related management systems (“Principles”).

The Principles are applicable throughout the entire supply chain. In some cases, the Principles may require suppliers to go beyond compliance with locally applicable laws and regulations. Suppliers are required to ensure that their employees and all direct or indirect subcontractors and agents acknowledge and adhere to the Principles and expectations specified in the Supplier Code of Conduct. No retaliatory action will be tolerated against anyone who raises concerns about possible violations of the Principles.

Ingersoll Rand expects suppliers to:

- Integrate and apply the Principles in a manner consistent with their own supplier programs;
- Operate in full compliance with all applicable national and international laws, rules, and regulations;
- Be aware of cultural differences and the challenges associated with interpreting and applying these Principles globally; understand the methods for meeting these expectations may vary and must be consistent with the laws, values, and cultural expectations of the different societies of the world; and
- Integrate the Principles into a continual improvement approach that advances supplier performance over time.

Ethics

We are committed to conducting our worldwide operations in accordance with the highest ethical standards and in compliance with all applicable laws and regulations and we expect the same of our business partners. Suppliers shall conduct their business in a compliant and ethical manner, with the utmost integrity.

Ingersoll Rand's expectations of its suppliers include, but are not limited to:

1. Preventing Bribery & Corruption

Suppliers must maintain complete compliance with the U.S. Foreign Corrupt Practices Act, U.K. Bribery Act and all other applicable anti-corruption laws in countries in which they conduct business. All forms of corruption, bribery, extortion and embezzlement are prohibited. Suppliers must never offer, request or accept bribes or permit subcontractors or others to do so on their behalf. Suppliers must implement appropriate, ongoing anti-bribery and corruption controls within their organization to eliminate the risk of non-compliance.

2. Avoiding Conflicts of Interest

Suppliers must avoid any situation that has the potential to influence their independence or personal judgment when engaged in business dealings with Ingersoll Rand. Suppliers must have appropriate controls and oversight in place to prevent conflicts of interest from affecting procurement and financial decision making.

3. Anticompetitive Practices

Suppliers must be in compliance with the Federal Trade Commission Act and follow anticompetitive guidelines and practices.

4. Compliance with Applicable Laws

Suppliers identify and comply with all the applicable national and international laws, regulations, codes and standards, both in the country in which the Supplier is based and in the country in which the service or products will be provided.

5. Animal Welfare

Animals shall be treated humanely with pain and stress minimized. Animal testing should be performed after consideration to replace animals, to reduce the numbers of animals used, or to refine procedures to minimize distress. Alternatives should be used wherever these are scientifically valid and acceptable to regulators.

6. Communication and Records

Suppliers shall safeguard and make only proper use of confidential information to ensure that company, worker, and personal privacy rights are protected. Suppliers must communicate with integrity and in accordance with any confidentiality agreements, disclose information in a timely and appropriate manner, and maintain accurate company books and records. Suppliers must also have appropriate

processes to archive and retrieve records that are relevant to investigations or litigations.

7. Trade Controls

Suppliers must comply with all applicable trade and customs laws, regulations, embargoes, economic sanctions and restrictions governed by recognized national and international authorities.

8. Conflict Minerals

Ingersoll Rand does not support the use of minerals or their derivatives, including tantalum, tin, tungsten and gold ("3TG"), that are illegally mined, transported or traded because of the role such minerals play in financing armed conflict in the Democratic Republic of the Congo and the adjoining countries, as well as in other high-risk and conflict-affected areas around the world. It is our policy to exercise due diligence over our supply chain in a manner consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas. We solicit our suppliers of material and components containing 3TG to complete the Responsible Minerals Initiative's Conflict Minerals Reporting Template no less than annually. In doing so, suppliers are expected to promptly respond to each solicitation and, if applicable, identify the smelters or refiners that processed the 3TG in their supplied products along with the country of origin of such 3TG. Suppliers shall adopt and comply with Ingersoll Rand's Conflict Minerals Policy which is located at: <https://investors.irco.com/governance/governance-documentsand-charters/default.aspx>

Labor

Suppliers shall be committed to uphold the human rights of workers and to treat them with dignity and respect.

1. Prohibiting Forced Labor

Suppliers shall not use forced labor, whether in the form of involuntary prison labor, indentured labor, bonded labor or any other form of human trafficking.

2. Prohibiting Child Labor

Suppliers shall not use child labor. The employment of young workers below the age of 18 shall only occur in nonhazardous work and when young workers are above a country's legal age for employment or the age established for completing compulsory education.

3. Non Discrimination and Harassment

Suppliers shall not discriminate against their employees or applicants for employment with respect to compensation, terms, conditions or privileges of employment, and shall provide a workplace free of harassment on the basis of any protected category under applicable law, such as race, color, religion, national origin, gender, age, sexual orientation, as well as union membership or political affiliation.

4. Wages, Benefits and Working Hours

Suppliers shall maintain working hours and pay workers according to applicable wage and hour laws, including minimum wages, overtime hours and legally mandated benefits which satisfy their basic needs and those of the members of their family who are directly dependent on them. This practice ensures an adequate standard of living, implying appropriate living conditions, above the poverty line of the society concerned, including necessary expenditures for adequate nutrition, clothing, housing and the necessary conditions of care when required. This may vary from country to country, reflecting the cost of participating in the everyday life of society.

5. Freedom of Association and Work Environment

Open communication and direct engagement with workers to resolve workplace and compensation issues is encouraged. Suppliers shall respect the rights of workers, as set forth in local laws, to associate freely, join or not join labor unions, seek representation and join workers' councils. Suppliers shall provide employees with a safe and healthy workplace and will endeavor to meet or exceed applicable safety standards. Ingersoll Rand does not tolerate any form of physical or mental violence including cruel, inhuman, and degrading ill treatment or punishment. Employees have the right to personal security and the company will provide reasonable measures to provide a safe workplace. Workers shall be able to communicate openly with management regarding working conditions without threat of reprisal, intimidation or harassment.

Environmental Sustainability, Health & Safety

Consistent with Ingersoll Rand's commitment to operating its business with the highest standards of environmental responsibilities for the long-term, sustainable growth for Ingersoll Rand, our business partners, and the communities in which we operate, Ingersoll Rand requires its suppliers to comply with all applicable regulatory requirements regarding the environment, health and safety, and shall operate an environmental, health and safety management system which underpins and proves compliance with all such regulatory requirements. Suppliers shall operate in an environmentally responsible and efficient manner to minimize adverse impacts on the environment and demonstrate a culture of continual improvement to further reduce resource and energy consumption. With this, suppliers should make practical and demonstrable efforts to minimize the use of energy, water and raw materials. Where possible, these resources should be renewable or sustainably sourced. Suppliers shall make practical efforts to eliminate or reduce levels of generated waste and should reuse and recycle waste materials wherever possible to further promote pollution prevention. Suppliers should consider the environmental credentials and performance of suppliers within their own supply chain and have a sustainable procurement policy in place for their own suppliers.

1. Green House Gas Emission Management

Suppliers are expected to identify, reduce, manage, and responsibly control Greenhouse Gas (GHG) emissions from their operations.

Suppliers shall regularly set science-based targets for emissions reduction, monitor their progress, and work on reducing GHG emissions through conservation efforts.

2. Waste Management

Suppliers should implement systems to ensure the safe handling of all types of waste including but not limited to air emissions and wastewater discharges.

Suppliers shall regularly set targets and reduce waste to landfill.

3. Biodiversity

Suppliers are asked to understand the importance of managing biodiversity risks in our global operations and mitigate any risks by not operating in or exploiting habitats of significantly important endangered species. Ingersoll Rand further asks that suppliers continue in their efforts to align with our sustainability goals by practicing land conservation and no deforestation.

Quality

Ingersoll Rand is committed to building high quality products. To ensure that we are providing safe and innovative products to our customers, we manufacture our products in compliance with all applicable laws and regulations. In addition, we do extensive product testing and quality assurance. Similarly, Ingersoll Rand expects our suppliers to assure the quality, safety and performance of the products and services they provide us. This way, we can assure the quality and safety of the products and services we provide our customers.

Management Systems

Suppliers shall use management systems to facilitate continual improvement and compliance with the expectations of these Principles. The management systems should be easily retrievable and clearly demonstrate compliance with all legal and customer requirements.

Cyber Security

1. Introduction to NIS2

The Network and Information Security Directive 2 (NIS2) is a landmark piece of legislation by the European Union aimed at enhancing cybersecurity across member states. It builds upon the first NIS Directive with broadened scope and more stringent requirements to ensure a high common level of cybersecurity across sectors that play a crucial role in supporting societal and economic activities. The key objective of NIS2 is to strengthen the resilience of critical infrastructures, improve cybersecurity responses, and foster cooperation and information sharing between EU countries. By mandating robust cybersecurity measures, NIS2 seeks to protect essential services and digital infrastructures from cyber threats, thus ensuring the uninterrupted delivery of services crucial to our economies and societies.

2. Application within Our Work

As an organization, Ingersoll Rand has been identified as an essential or important entity in the context of the NIS2, and as such will need to comply with strict requirements set for the cybersecurity of our digital assets and infrastructure. NIS2 significantly impacts several aspects of our operations, including risk management, incident response, and business continuity planning. Compliance with NIS2 will involve adopting systematic security measures, regular risk assessments, and timely reporting of cybersecurity incidents. These practices will be integrated into our day-to-day activities to ensure that our systems are secure, reliable, and resilient.

3. Application to suppliers

Ingersoll Rand will be required to identify, monitor, and report on risks within their supply chain. Suppliers will be required to comply with Ingersoll Rand's cybersecurity requirements and will be exposed to periodic cybersecurity assessment to ensure a high-quality meeting the standards of Ingersoll Rand. Additionally, Ingersoll Rand has the power to subject suppliers to a targeted security audit by an independent third-party.

4. Why NIS2 Compliance is Important for us

- a) Complying with NIS2 strengthens our cybersecurity posture, thereby enhancing trust and reliability amongst our stakeholders, clients, and partners. It is a testament to our commitment to safeguarding their information and interests.
- b) Non-compliance with NIS2 could lead to significant legal and financial consequences, including penalties and reputational damage. By ensuring compliance, we mitigate these risks and demonstrate our adherence to statutory requirements.
- c) Effective cybersecurity measures ensure the continuity of our critical operations and protect against disruptions that can have widespread implications on our service delivery and organizational goals.
- d) A robust cybersecurity framework could serve as a competitive differentiator in the marketplace, showcasing our resilience and innovation in safeguarding digital resources.

5. Our Commitment

Our organization is fully committed to adhering to NIS2 requirements. We shall deploy all necessary resources to ensure compliance and continuously improve our cybersecurity practices. By doing so, we fortify our defenses against potential cyber threats and ensure longevity and sustainability in our endeavors.

6. Conclusion

Adhering to NIS2 is not just a regulatory requirement but a strategic imperative. It empowers us to pre-emptively address cybersecurity challenges and positions us to better serve our community, partners, and stakeholders. We are dedicated to working collaboratively within our organization and across our network to meet and exceed these cybersecurity standards.
